

System Requirements

The system requirements for Flexicoder are the same as those for Microsoft Dynamics GP. You can review the Microsoft Dynamics GP 2013 System Requirements documentation on CustomerSource or PartnerSource.

Prerequisites

Installing Flexicoder 2013 requires that you are using Microsoft Dynamics GP 2013.

If you are using Microsoft Dynamics GP 2013 R2 (12.00.1745), you will need to be on Flexicoder build 10 or higher for it to be compatible.

Registration Keys

After installing this Flexicoder build, you will need registration keys for it. If you previously had Flexicoder installed, once you install this update, you will not need need to enter new registration keys.

Fix List

12.00.0010:

- RMA documents not recoding when inventory and offset accounts not both being recoded
- Cannot recode RMA transactions using Extender fields
